SPACING WHEEL - PSW-10

SPACING WHEEL - PSW-10

The Packserv PSW-9 Packserv Spacing Wheel is mounted on the side of a conveyor and is used to evenly space out containers running along a conveyor belt.

The 20cm (7.8 in) diameter PCV wheel comes with a variable speed controller that is also reversible to allow mounting on either side of the conveyor.

The spacing wheel is suitable for food and pharmacutical use and allows for fast changeover of containers and does not require tools for adjustments.

ADDITIONAL INFORMATION

- Fast changeover of products and parts
- No tools required for setting adjustments
- Suitable for food, cosmetics and pharmaceutical industries

- Reversible with a single button
- Can be easily mounted on a conveyor
- Spaces containers of all shapes and materials
