ACCUMULATION TABLE - PAT-8

ACCUMULATION TABLE - PAT-8

The PAT-8 Sorting Table is designed to reduce the number of operators required to load and pack off from an automatic line. The accumulation table collects the containers at the out-feed end of the conveyor for packing off into cartons.

The 1200mm (4ft) HDPE tabletop is designed to handle a large number of containers at the end of a production line.

ADDITIONAL INFORMATION

- Suitable for food, cosmetic, and pharmaceutical use
- Speed adjustable
- Accessories to suit various applications
- Can be connected to a conveyor or stand-alone operation
- 316 stainless steel and aluminium construction

- Fast changeover of container types
- Mounted on lockable castors/wheels
- Fitted with threaded levelling jacks
- Driven by a variable speed AC motor and controller
- Fully guarded on edges with safety torque limiting device
